«thank you [@instagram](#) for providing me with the exact response my work was created to critique. you deleted a photo of a woman who is fully covered and menstruating stating that it goes against community guidelines when your guidelines outline that it is nothing but acceptable. the girl is fully clothed. the photo is mine. it is not attacking a certain group. nor is it spam. and because it does not break those guidelines i will report it again. i will not apologize for not feeding the ego and pride of misogynist society that will have my body in underwear but not be okay with a small leak. when your pages are filled with countless photo/accounts where woman (so many who are underage) are objectified. pornified. and treated less than human. thank you.

this image is a part of my photoseries project for my visual rhetoric course. you can view the full series at rupikaur.com the photos were shot by myself and [@prabhkaur1](#) (and no. the blood. is not real.)

i bleed each month to help make humankind a possibility. my womb is home to the divine. a source of life for our species. whether i choose to create or not. but very few times it is seen that way. in older civilizations this blood was considered holy. in some it still is. but a majority of people. societies. and communities shun this natural process. some are more comfortable with the pornification of women. the sexualization of women. the violence and degradation of women than this. they cannot be bothered to express their disgust about all that. but will be angered and bothered by this. we menstruate and they see it as dirty. attention seeking. sick. a burden. as if this process is less natural than breathing. as if it is not a bridge between this universe and the last. as if this process is not love. labour. life. selfless and strikingly beautiful.»

However, there is a real danger. If it is public that you have a BlackBerry and it is government and you are using it, government or not, to do business, it may become an official record and subject to the law. Reading about the President's 88 rules this morning, it sounds like it won't be as useful as it used to be. Be very careful. I got around it all by not saying much and not using systems that captured the data.

Due to the
convenience,
affordability,
and broad reach
of social media
platforms such as
YouTube, Facebook
and Twitter,
terrorist groups
have increasingly
used social
media to further

their goals and spread their message. Attempts have been made by various governments and agencies to thwart the use of social media by terrorist organizations.
